Re: New Health Reform Regulations

Dear GBAS Clients,

Over the past 18 months there have been sweeping changes in the Healthcare Market related to new laws, guidelines and federal regulations. The administration of Healthcare benefits is becoming more challenging everyday. The latest legislation impacting our market was the passing of The Affordable Care Act in March 2010.

We know there are more changes still to come. Let me assure you we are continually monitoring the release of information and how it will affect GBAS Users. We have a SunGard iWorks GBAS Team dedicated to receiving and reviewing any new laws or regulations and how they impact benefit administration in GBAS. Among the changes currently in process are: 5010, HITECH, and ICD-10.

With the existing flexibility in GBAS today, many of the changes will easily be accommodated by current functionality. In these instances, we can provide feedback and consultation on how to configure your system to meet any new requirement. Some of the changes will require modifications to GBAS, which will then dictate new releases, patch tapes or uploads to follow. Therefore, it is imperative that your company remain on a current version of GBAS at all times.

The implementation of new laws, regulations, and guidelines will be demanding for all of us. We will keep you updated on the status via bulletins, e-mail blasts, Client's Only website postings, Webinars and other like methods. Please let me know if you have any questions or concerns. I look forward to working with you as we make these transitions together.

Best Regards,

Dan Wallin
SVP, iWorks GBAS
